Study Title: Effects of AI on Research Compliance Efficiency

Principal Investigator: Dr. Jane Doe

Institution: University Research Institute

Study Duration: 12 months

Summary:

This study aims to evaluate how AI tools can support researchers in expediting the compliance documentation process, particularly for IRB submissions. We will collect user feedback through surveys and interviews.

Data Collection Methods:

- Surveys (online)
- Semi-structured Interviews
- Document analysis

Risk Level: Minimal

Informed Consent: Required
